

The first of these is the fact that the
 world is not a uniform whole, but a
 complex of many different parts, each
 with its own characteristics and laws.
 This is the principle of diversity, which
 is the basis of all life and activity.
 The second is the fact that the world
 is not a static whole, but a dynamic
 whole, which is constantly changing and
 developing. This is the principle of
 change, which is the basis of all
 progress and improvement.

The third is the fact that the world
 is not a chaotic whole, but an ordered
 whole, which follows certain laws and
 principles. This is the principle of
 order, which is the basis of all
 stability and security. The fourth is
 the fact that the world is not a
 self-contained whole, but a whole
 which is part of a larger whole, the
 universe. This is the principle of
 unity, which is the basis of all
 harmony and peace.

These four principles are the foundation
 of all human knowledge and activity.
 They are the principles of diversity,
 change, order, and unity. They are
 the principles of life and activity, of
 progress and improvement, of stability
 and security, and of harmony and
 peace. They are the principles of the
 human mind, and they are the principles
 of the human world.
